

Purpose & SOL

- The students will round numbers to the nearest tens place.
- Math 2.1d

Materials

- 2 sets of Round 'Em Up cards, laminated, each set printed on a different color.
- Round 'Em Up recording sheets.

Length
20 min.

Introduction

The teacher will begin the activity with the explanation that some numbers are strong (flex muscles) and others are weak (reach down and touch your toes). Encourage students to explore this idea, have them stand, call out numbers in the ones place and have students stand and show you whether they are strong or weak. Review place value and rounding.

Implementation

Scout

- 1) The teacher will show the students the different Round 'Em Up cards and how to record their response on the recording sheet.
- 2) Divide the class into groups of 2 and give each student their own recording sheet.
- 3) Assign teams to a specific set of cards so that there are enough cards for each group. This game will be played like Scout.
- 4) Students will travel from card to card rounding to the nearest 10. Be sure they are recording their answers and doing the assigned physical activity.
- 5) When they've gone around to all 12 cards, the game is over.

Cool Down

Take three deep inhales and stretch.

Modifications

Use one set of cards and have the students work in pairs.

#1

Round the number to the nearest 10:

44

Do 7 Hops

#2

Round the number to the nearest 10:

81

Do 4 Squats

#3

Round the number to the nearest 10:

17

Do 8 Arm Circles

#4

Round the number to the nearest 10:

22

Do 10 Scissor Kicks

#5

Round the number to the nearest 10:

92

Do 6 Cross Crawls

#6

Round the number to the nearest 10:

65

Do 10 Squats

#7

Round the number to the nearest 10:

78

Do 6 Sky Punches

#8

Round the number to the nearest 10:

13

Do 8 Scissor Kicks

#9

Round the number to the nearest 10:

37

Do 8 Hops

#10

Round the number to the nearest 10:

28

Do 10 Cross Crawls

#11

Round the number to the nearest 10:

74

Do 12 Arm Circles

#12

Round the number to the nearest 10:

33

Do 8 Sky Punches

Name: _____

Rounding 'Em Up Scoot

Directions: Round each number to the nearest 10. After you write your answer, complete your exercise.
